Profile Summary

Full Stack Engineer with **4 years of combined professional and internship experience** building scalable, production-grade web applications using **React**, **Next.js**, **Node.js**, and **PostgreSQL**. Proven track record of delivering complex, user-facing platforms in **remote Agile teams**, with strong ownership across frontend architecture, API integration, and performance optimization. Experienced in modern state management, RESTful API design, and cloud-based deployments, with a strong focus on maintainable code, measurable impact, and continuous improvement.

Skills

- React
- Next.js
- TypeScript
- JavaScript (ES6+)
- Tailwind CSS
- Redux Toolkit
- RTK Query
- Node.js
- RESTful APIs
- Authentication (JWT)
- PostgreSQL
- MongoDB
- MySQL
- Azure
- Git / GitHub

Work Experience

Full Stack Engineer

Jan 2025 – Present

Meridian Creative Solutions

- Own frontend architecture for **Explor.App**, a multi-tenant lead and itinerary management platform supporting multiple companies and distributed teams in the tourism industry.
- Designed and implemented a scalable **Next.js + React** frontend using **Material UI**, improving maintainability and enabling rapid feature delivery across role-based user experiences.
- Built a **drag-and-drop itinerary builder** using **dnd-kit**, enabling non-technical users to assemble complex itineraries and reducing creation time by approximately **60%**.
- Integrated **Google Maps API** to visualize routes, locations, and daily travel plans, directly increasing user engagement and itinerary clarity.
- Implemented centralized state management using **Redux Toolkit** and **RTK Query**, reducing redundant network requests by approximately **40%** and improving UI consistency.
- Developed complex, high-usage forms using **Formik**, improving validation reliability and increasing successful form completion rates.
- Delivered customer-facing features including **shareable live itinerary links**, **PDF exports**, and transport and accommodation summaries, significantly improving end-user transparency.
- Collaborate daily with designers, backend engineers, and stakeholders in an **Agile, remote-first environment**, contributing to sprint planning, reviews, and continuous improvement.

Associate Software Engineer

Jul 2024 – Oct 2024

Maxfinity Pvt. Ltd.

- Contributed to the development of **Maxi**, a production ad-posting platform, delivering approximately **70%** of the initial frontend architecture using **React**.
- Implemented **lazy-loaded routing**, reducing initial bundle size and improving page load performance by approximately **30–60%**.
- Utilized **RTK Query** for scalable API consumption, improving network efficiency by **25–50%** and reducing data-fetching boilerplate.

- Built responsive, mobile-friendly UI components using **Tailwind CSS**, improving usability across multiple device sizes.
- Streamlined form workflows using **Formik**, reducing client-side validation errors by approximately **25%**.

Software Engineer – Intern

Jul 2023 – Jan 2024

ITX360 Pvt. Ltd., Colombo, Sri Lanka

- Worked on **XTrack**, an AI-powered document management system, contributing to both frontend and backend features.
- Built UI components using **React**, **Redux Toolkit**, **RTK Query**, and **Material UI**, reducing UI development time by approximately **30%**.
- Developed backend APIs using **ASP.NET Core**, **EF Core**, and **CQRS**, improving data handling efficiency and system reliability.
- Integrated **PostgreSQL** databases and deployed services on **Azure**, improving query performance by approximately **40%**.

Projects

WorkWise (ASP.NET Core + ReactJS)

2024

Developed a system for managing departments and employees with **ASP.NET Core**, **ADO.NET**, and **SQL Server**, optimizing data handling by 30%. Created a responsive frontend using **ReactJS** and **React MUI**, including features like automatic employee age calculation.

Tags: ASP.NET Core, ADO.NET, SQL Server, ReactJS, React MUI

Links: Project Repository

Recipe App (MERN Stack)

2024

Built a **MERN stack** web app with **React**, **MUI**, and **Redux RTK Query**, improving network efficiency by 50% and reducing boilerplate code by 40%. Implemented **MongoDB** and **JWT** for secure authentication.

Links: Backend, Frontend

Resto - Restaurant Management System

2023

Engineered an innovative restaurant management application using the **MERN stack**, streamlining operations and increasing user engagement by 30% through enhanced order tracking and inventory features designed for real-time updates. **Link:** Source

Education

Bachelor of Computer Science (BCS)

2020 - 2024

University of Ruhuna, Sri Lanka

GCE Advanced Level Examination

2016 - 2018

G/Sri Devananda College, Ambalangoda, Sri Lanka

Subjects: Combined Mathematics (B), Chemistry (B), Physics (B)

Professional Qualifications

Comprehensive Master Java Developer Diploma

2020

Institute of Software Engineering (IJSE), Sri Lanka
